

## **Release Notes for the Manifesto Project Dataset / MARPOR Full Dataset:**

### **Updates (2011-2016b), changes, corrections, and known errors**

#### **Known bugs, errors and problems (which will be fixed with next update)**

- perview variable of party 35313 and 35520 at the 1980 election are switched
- perview of 63110 in 2013 election should be 8.65

#### **MARPOR Full Dataset 2016b: December 2016 Version**

##### **Elections added:**

- Spain 2015
- Canada 2015
- Japan 2014
- Israel 2003/2015
- Croatia 2011
- Latvia 2011/2014

##### **Individual manifestos added for existing elections:**

- Reformed Political Party (22952: 1986 and 1989)
- Reformed Political League (22527: 1989)
- Reformatory Political Federation (22528:1989)
- Centre Democrats (22711:1989)

##### **Recoded/replaced documents:**

- We substituted the document for the Canarian Coalition (33907: 2000) with the correct manifesto
- We replaced the code frequencies for several observations from the Austrian elections 1999 and 2002 with the recodings conducted for Mapping Policy Preferences III. Significant changes in all content analytical categories and changes in the rile up to 18 points (see below).

### Changes due to the Alignment of the Manifesto Dataset with the Manifesto Corpus:

- With this update we aligned the Main Dataset with the Manifesto Corpus (for more information on the Manifesto Corpus, please read: <https://manifesto-project.wzb.eu/information/documents/corpus>) . The code frequencies (per categories, rile, ...) from all documents that are also covered by the Manifesto Corpus are now automatically calculated from the Manifesto Corpus. This led to many very small changes in the content analytical categories in a large number of observations. Most of these changes are very small and due to the improved cleaning and code checking procedures that were applied when these documents were put into the Manifesto Corpus.
- We made an effort to digitize some documents that were coded on paper copies in the past. As these documents are now in the Manifesto Corpus, we re-counted the codes instead of using the old code frequencies from the dataset that were based on human counting. This produces some differences to the last version of the dataset due to counting errors and some coding corrections during the digitization procedure. This produces in many observations very small changes in the totals and per variables. In an extreme case (Danish Centre Party 13330 at the 1998 election) corrections of 20 codes that were wrongly counted as 505 instead of 506 change the rile by 18 points. A similar case is the Social Democratic Party's manifesto (13320) at the same election where 21 codes were added that changed the rile by about 6 points.
- We added a variable *corpusversion* to the dataset. This variable indicates the version of the Manifesto Corpus used to calculate the code frequencies in the Main Dataset. The variable is missing for all documents that were not taken from the corpus, but are based on paper codings from the past. Thereby, it indicates for which observations in the Main Dataset annotations are available in the Manifesto Corpus.

### Overview of observations with significant changes due to the Corpus-Dataset alignment

- The following overview documents significant changes between version 2016b and version 2016a (for the above explained reasons). This list contains all observations with a change in rile larger than 1 or a change in the total number of quasi-sentences larger than 20:

| country | party | date   | partyname                  | rile_diff | rile_old | rile_new | total_diff | total_old | total_new |
|---------|-------|--------|----------------------------|-----------|----------|----------|------------|-----------|-----------|
| 13      | 13330 | 199803 | Centre Democrats           | 18.205    | 4.186    | -14.019  | 1          | 215       | 214       |
| 33      | 33907 | 200003 | Canarian Coalition         | 6.455     | -4.725   | -11.18   | 994        | 1799      | 805       |
| 13      | 13320 | 199803 | Social Democratic Party    | 6.03      | 4.986    | -1.044   | 22         | 361       | 383       |
| 64      | 64620 | 199911 | New Zealand National Party | 4.946     | 37.063   | 32.117   | 6          | 143       | 137       |
| 32      | 32640 | 201302 | Labour and Freedom List    | 4.649     | -5.578   | -10.227  | 13         | 251       | 264       |
| 33      | 33907 | 200403 | Canarian Coalition         | 3.853     | -5.258   | -9.111   | 51         | 951       | 900       |
| 41      | 41113 | 199809 | Alliance'90/Greens         | 2.978     | -19.425  | -16.447  | 702        | 1426      | 2128      |
| 13      | 13229 | 200502 | Red-Green Unity List       | 2.959     | -43.119  | -46.078  | 14         | 218       | 204       |

|    |       |        |                           |       |         |         |     |      |      |
|----|-------|--------|---------------------------|-------|---------|---------|-----|------|------|

| 51 | 51902 | 200106 | Scottish National Party   | 0.159 | -13.038 | -12.879 | 21  | 813  | 792  |
| 33 | 33611 | 200003 | Convergence and Union     | 0.082 | -0.362  | -0.444  | 57  | 2759 | 2702 |
| 33 | 33908 | 200803 | Galician Nationalist Bloc | 0.023 | -11.878 | -11.901 | 31  | 1347 | 1378 |

#### Smaller corrections:

- Corrected the coderid for Montenegro 2002 elections
- Corrected the party id of an Israeli manifesto at the 1965 elections from 72323 -> 72320

- Corrected the party id of a Slovenian manifesto at the 2001 election from 97620 -> 97521
- Corrected the party id of a Mexican manifesto at the 1997 election from 171201 -> 171101
- Corrected absseat for Social Democratic (35313) and the Social Democratic Center Party (35520) at the Portuguese elections in 1980 (they were switched)
- Corrected pervote for the Croatian HDZ in all elections.
- Corrected the party family coding for the Democratic Party of Socialists of Montenegro (91220) at the 1998 elections to be the same as in all other elections.

## MARPOR Full Dataset 2016a: May 2016 Version

### Elections added:

- Bosnia & Herzegovina 2010/2014
- Estonia 2015
- Greece January/September 2015
- Japan 2003/2005/2009/2012
- Latvia 2006/2010
- Moldova 2014
- Montenegro 2001/2002/2006/2009/2012
- Turkey June/November 2015
- UK 2015

Raw data (digitalized and annotated electoral programs) for most of these observations can be accessed via the Manifesto Corpus (see <https://manifesto-project.wzb.eu/information/documents/corpus>). These entries are based on version 2016-3 of the Manifesto Corpus.

### Individual manifestos added:

We added 12 electoral programs of (mostly) smaller Dutch parties, and one UK party:

- Communist Party of the Netherlands (22210:1946),
- Reformed Political Party(22952:1946,1994,1998,2002),
- Reformed Political League (22527:1994),
- Reformatory Political Federation (22528:1994,1998),
- Centre Democrats (22711:1994),
- General Elderly Alliance (22954:1994),
- Union55+ (22955:1994),
- Scottish National Party (51902:1997).

### New variables:

- A new variable *datasetversion*, constant for all observations, indicates the version of the dataset. It helps keep track of the dataset version even if, for example, the filename is changed.

- We decided to split the information contained in the *partyname* variable (party abbreviation + partyname) into two variables in order to facilitate labeling graphs with party abbreviations. Now *partyname* only represents the name of the party, in English. The new variable *partyabbrev* represents the abbreviation of the party name.
- We added a new variable indicating a coder's reliability based on his/her coding of the entry test. This measure compares the sequence of codes from a coder's entry test to the sequence of codes from the master copy of the entry test. The new variable *testedsim* indicates the relative Levenstein distance between the two sequences of codes, and subtracts it from 1 (a value of 0 indicates no matching codes, 1 indicates all codes match).

#### Corrections and changes:

- 28 observations (elections from Hungary, Cyprus and Greece) coded with version 5 of the coding instructions incorrectly left out one new sub-category (606\_1:civic mindedness: general +) in the calculation of the *rile* variable. We corrected this. For these 28 observations this led to an average error of 2.2 in the *rile*. In four cases the *rile* error was more than 5, with a maximum error of 22.
- We completed the standardization the calculation of the coding reliability by slightly changing the coding of the entry test master copy of manual 4 and 5, and recalculated the reliability scores (Krippendorff's Alpha, variable *testresult*) of the coders that were trained with manual 4 or 5. This affects 456 cases. The change in Krippendorff's alpha for these cases ranges from -0.13 to +0.23 with a median of 0.003. We also added a new variable to measure the coding reliability called *testedsim*, see above.
- We substituted the document that was coded for the New Zealand National's Party from the 2011 election. The former coding was based on a speech, the new coding is based on the party's manifesto. All per variables, *progtype* and the indicators have changed.

#### Smaller changes:

- The Serbian Democratic party appeared twice in the dataset with different codes (79955 and 79952). We changed 79952 to 79955.
- The Democratic Party of Socialists of Montenegro (91220 and 91322) appeared twice in the dataset. We changed 91322 to 91220.
- The manual variable (indicating the version of the coding instructions used to code the program) was corrected and changed from 3 to 4 for the Lithuanian elections in 2008.
- We deleted the entry for the joint list bloc (81899) from the 2000 Croatian elections as it resulted in showing a higher number of seats than the size of the parliament. The observation for the electoral alliance first appeared with MPP2, and was an estimate based on codings from prior elections. It should have been but was not removed when the individual parties of the electoral alliance were coded and added to the dataset.
- We also deleted a single estimate for the Montenegrin 2002 election and replaced it with the coded 2002 manifesto.
- We set the *pervote* of the Fidesz\_MPP-MDF alliance to 0, because the two parties are individually in the dataset with their respective voteshare.
- Changed *parfam* from 60 (conservative) to 20 (socialist) for the Progressive Party (61622), a minor US party from the 1948 election.
- We recoded some entries of *parfam* from 0 to 98 and other more meaningful codes to avoid the 0 *parfam* code. This only concerns electoral alliances.
- Changed the name of country 51 from "Great Britain" to "United Kingdom".

## MARPOR Full Dataset 2015a: May 2015 Version

### New elections:

Armenia 2012, Cyprus 2006/2011, Greece 2007/2009/2012 May election/2012 June election, Hungary 2014, Macedonia 2014, Netherlands 2012

A note on the Greek data:

We advise to use the Greek data, in particular after the financial crisis, with caution for two reasons. First, collecting proper electoral programs is a challenge in Greece. In many cases, electoral programs in the classical sense do or did not exist. Many of the coded documents are the best equivalents that we could find, however some of them are very short and hardly cover a broad range of policy issues. Second, we advise to use other estimates than the rile for left-right positions. After the financial crisis a huge part of the political discourse in Greece was based on blaming the political elites for their failures. Such statements fall under the 305 category in the MARPOR scheme. Especially the Left parties (Syriza and KKE) blamed the former elites from PASOK and ND for the crisis. The rile score considers 305 as a right-wing category, moving these left parties to (extremely) right-wing positions. Considering 305 a right-wing category is definitely problematic in Greece and we advise to use other estimates than the rile to measure left-right positions in Greece.

### Changes:

For the first time, we release data coded with the new version of the coding instructions/category scheme (version 5). This version contains new subcategories which are easily identifiable in the dataset as they contain an underscore (eg. per301\_1). The first three digits indicate the main category to which they are related. The new coding instructions foresee that the new subcategories are used instead of the respective main categories. Currently, the new categories are aggregated into the former main categories according to the scheme below to ensure the over-time comparability of the dataset. So, scholars interested in long-time series can simply continue to use the existing main categories (per101-706, including eg. the rile) as they did in the past and ignore the new categories. Scholars interested in the new categories should be aware that the respective main categories of the new subcategories are aggregates of the new categories (i.e. if one uses the main categories together with the new subcategories the per-variables will likely add up to more than 100%). For more information on the new coding scheme, please visit our website.

| per608_3 multiculturalism: indigenous rights -     |                               |
| per703_1 agriculture and farmers +                 | per703 agriculture +          |
| per703_2 agriculture and farmers -*                |                               |

To make data coded with version 5 comparable with data coded with former versions, the summed shares of the new subcategories can be aggregated to the share of the main category. \*The only exceptions are the categories 202\_2, 605\_2 and 703\_2 which have to be added to the uncoded sentences, as such issues were not covered in the handbook 4 category scheme and these sentences were thus previously coded as 000.

#### Replacement/Recoding of content analytical data:

German Green Party (41113 @ 2013): 26 quasi-sentences (of over 5000 in total) in the document were not counted correctly. Per categories, rile, etc. are corrected. The estimates hardly changed (eg. rile changed from -19.59 to -19.51)

Swiss EVP Protestant People Party (43530 @ 2003): All codes on the backside of this document were not counted. Per-categories changed quite a lot as the total number of quasi-sentences almost doubled (from 64 to 126).

Macedonia VMRO-DPMNE (89710 @ 2003): per-categories incorrectly indicated the frequencies of a wrong document. All per-categories and their aggregates were corrected. Per categories, rile, etc. changed significantly.

**Smaller changes/corrections:**

We changed the order of the variables in the dataset. The total and peruncod variable are now between the datasetorigin and the per101 variables.

Pro Patria and Res Publica Union (83611 @ 2007): progtpye corrected to 4

Party for the Animals (22951): party family code (parfam) corrected to 95 (special issue)

SGP Refomred Political Party (22952): party family code (parfam) corrected to 95 (special issue)

**MARPOR Full Dataset 2014b: December 2014 Version**

|          |   |   |
|----------|---|---|
|          | whole election  | Luxembourg 2013, Australia 2013, Armenia 2007, Georgia 1990, South Africa 2014, Mexico 2009/2012, Serbia 2014, Czech Republic 2013  |
|          | whole election – replacing existing data                | Germany 1998 / 2002 All codings replaced by more recent recodings. The former coding of the Green party in 1998 was based on a bad proxy document (see Chapter on “Coder Training: Key to Enhancing Coding Reliability and Estimate Validity” for more details on the recoding). Therefore we replaced it. As we prefer (if possible) to provide data from the one coder for all parties from one election, we replaced the other data as well. |
| new data | single parties – additions and updating of missing data | Italy 2013 Added manifesto of the South Tyrolean People’s Party (32904)<br>Turkey 2007 Added manifesto for Democratic Society Party (74326)<br>Macedonia Added manifesto for Democratic Union for Integration (89940:2011), Socialist Party of Macedonia (89320:2008), Democratic Party of Turks (89920:2006)   |
|          | general changes   | per301 The label of per301 was changed from federalism to decentralization to reflect more accurately the content of the category.  |
|          | on the election level                                   | The edate variable for all elections from the update 2014a were wrong (by one day) and are corrected with this update. These concerns the following elections:<br>Canada 2011 edate corrected<br>France 2012 edate corrected<br>New Zealand 2011 edate corrected<br>Slovakia 1998 edate corrected<br>Switzerland 2011 edate corrected<br>Portugal 1979 edate corrected<br>Iceland 2013 edate corrected<br>Bulgaria 2013 edate corrected         |
| changes  |   |   |

|  |  |  |
|--|--|--|
|  | Macedonia 2002, 2006, edate corrected<br>2008, 2011                          |  |
|  | Romania 2012   | edate corrected  |
|  | Mexico 2006  | edate corrected  |
|  | South Africa 1994, 1999, edate corrected<br>2004, 2009                       |  |
|  | Lithuania 2008   | Totseats was corrected from 70 to 141.   |
|  | Turkey 2011  | corrected eumember-variable from 0 (no member) to 20 (applicant)   |
|  | Macedonia 2006, 2008 eumember was corrected to 20 (eu applicant)<br>and 2011 |  |
| on the party<br>level at one<br>election point | Lithuania 2008   | Absseat incorrectly indicated only the seats from the proportional tier. We corrected absseat to cover seats from the proportional and the majoritarian tier.  |
|  | Luxembourg 2004<br>2009  | /Codes 101 and 102 should not be used in Luxembourg, quasi-sentences with these codes were recoded which causes small changes in some per-categories.<br>Partyid for the Green Party in 2004 and 2009 was corrected from 23114 to 23113. |

|             | general changes       | <p>The coding of missings was changed:</p> <ul style="list-style-type: none"> <li>- Missing Information / Not Applicable is now coded as “.” for continuous variables (testresult, coderyear, pervote, presvote, absseat, totseats, perXXX, peruncod, total, rile, planeco, markeco, welfare, intpeace).</li> </ul> <p>Missing data in categorical variables (parfam, coderid, manual, progtype) was not changed. It is still coded as 998 (not applicable) and 999/99 (missing information).</p> <p>The following observations were accidentally deleted with the 2013b version due to a programming error:</p> <p>New Clean Government Party (71530) 2003; New Clean Government Party (71530) 2005; New Conservative Party (71626) 2003; Peace and Democracy Party (74325) 2011; ZL Joint List Bloc (81899) 2000; United Opposition (National Council/Rights) (84041)2008; Bidzina Ivanishvili – Georgian Dream (84042) 2012; Republican Party of Georgia (84440) 2008; Christian-Democratic Movement (84530) 2008; SzDSz Alliance of Free Democrats (86422) 2002; FiDeSz-MPP/MDF Alliance (86429) 2002; Labour Party and Youth (88042) 2008; Liberal Movement (88450) 2008; Order and Justice (88460) 2008; Homeland Union (88621) 2008; National Resurrection Party (88630) 2008; Palikot's Movement (92440) 2011.</p> <p>All observations were reincorporated in this dataset version.</p> <p><del>We changed the country abbreviations in the label of the party variable to international iso standard abbreviations</del></p> |
| corrections | On the election level | <p>Georgia 2003/2004      The documents in the dataset coded as Georgia 2004 were mainly written for the election in 2003. We changed the election date, pervote, seats, etc. for most of these manifestos to the 2003 values. Moreover, we discovered some of the real 2004 manifestos and coded these documents as well (see above). But be aware that the 2003 election was annulated. In contrast to our general guideline to focus on (rather) democratic elections, we still provide data for this election for the simple reason that the data is already coded and it might be – despite the undemocratic character of the elections – be useful for researchers interested in Georgian politics.</p> <p>Bulgaria 1994, Slovakia edate was corrected.<br/>1998, Latvia 2002,<br/>Germany 1976/1980</p>  |

|                                    |   |   |
|------------------------------------|---|---|
|                                    | Greece 2004   | The incorrect usage of subcategory 6014 (Cyprus-issue) in three manifestos (34313, 34511 and 34210) was corrected. Note: per6014 should only be used in Cyprus. Sentences in this category were recoded to per101 and per102. |
| on the party level at one election | Front National 31720 (France 2002)<br>DSP Democratic Left Party 74324 & ANAP Motherland Party 74623 (Turkey 2002) | We decided to drop both observations because both parties gained no seats at this election and both observations were only duplicates (proctype = 3) of the codings from 1999.  |
